

# Attic & Ceiling Insulation

Up to \$1,800 is available for attic or ceiling insulation upgrades that insulate a minimum of 20% of the total area of the attic or ceiling.

Grant Amounts			
Existing level of insulation	Attic: Achieved total minimum insulation value of R-50 for the attic	Flat Roof and/or Cathedral Ceiling: Achieved total minimum insulation value of R-28 on a flat roof and/or cathedral ceiling.	Flat Roof and/or Cathedral Ceiling: Achieved a total minimum of R-20 on a previously uninsulated flat roof and/or cathedral ceiling.
No insulation	N/A	N/A	\$600
R-12 and Less	\$1,800	\$600	\$600
Between R-12 and R-25	\$600	\$250	N/A
Between R-25 and R-35	\$250	N/A	N/A

# Exterior Wall Insulation

Up to \$5,000 is available for exterior wall insulation upgrades that insulate a minimum of 20% of the exterior wall area (excluding foundation walls, which are a separate grant - see below in Basement/Foundation Insulation).

The total reimbursement amount is prorated based on the total percentage of the wall that a homeowner chooses to insulate. If you insulate 50% of your wall area, you will receive 50% of the amounts listed below. To achieve the full amounts below, 100% of the wall area must be insulated.

For homeowners of a semi-detached or end unit row house, the maximum grant eligibility is 75% of the below amounts. For a middle-unit row house, the maximum grant eligibility is 50% of the below amounts. There are no grant incentives for insulating walls between individual units.

<b>Grant Amounts</b>			
<b>Percent of exterior wall area insulated</b>	<b>Add insulation value of R-7.5 to R-12</b>	<b>Add insulation value of R-12 to R-20</b>	<b>Add insulation above R-20</b>
20%	\$660	\$760	\$1,000
100%	\$3,300	\$3,800	\$5,000

# Basement/Foundation Insulation

Up to \$1,500 is available for basement or foundation wall insulation that insulates a minimum of 20% of the wall area of the foundation, including basement and crawl space walls.

For homes with both a basement and crawlspace, the below grants are pro-rated to a maximum of \$1,500. The below grants can be combined to increase the total grant amount. For instance, a homeowner can improve the basement wall insulation alongside insulating the entire basement header to receive both grant amounts.

For homeowners of a semi-detached or end unit row house, the maximum grant eligibility is 75% of the below amounts. For a middle-unit row house, the maximum grant eligibility is 50% of the below amounts. There are no grant incentives for insulating walls between individual units.

Seal and insulate at least:	Grant Amounts
80% of your entire basement header area to increase its insulation value by a minimum of R-20	\$240
50% of your entire basement slab by a minimum of R-3.5	\$400

Minimum Additional Basement Wall Insulation	Grant Amounts
---	---------------

Percent area that you choose to insulate	Add insulation value between R10 and R22	Add insulation greater than R22
20%	\$210	\$300
100%	\$1,050	\$1,500

## Crawlspace Insulation

Up to \$1,300 is available for adding insulation to crawlspace walls and header or crawlspace ceiling. The entire crawlspace area defined in your home energy audit must be insulated in order to receive the below amounts.

If you are also insulating your basement, the maximum available grant is \$1,500 between both basement and crawlspace.

For homeowners of a semi-detached or end unit row house, the maximum grant eligibility is 75% of the below amounts. For a middle-unit row house, the maximum grant eligibility is 50% of the below amounts.

<b>Grant Amounts</b>			
<b>Crawlspace Area</b>	<b>Crawlspace Walls: Add insulation value of R-10 to R-22</b>	<b>Crawlspace Walls: Add insulation value greater than R-24</b>	<b>Crawlspace Ceiling: Add insulation value greater than R-24</b>
Insulate 100% of the crawlspace's total exterior wall area, including the header area.	\$1,040	\$1,300	N/A
Insulate 100% of the crawlspace's ceiling (preferably with minimum continuous insulation)	N/A	N/A	\$800

## **Garage/Exposed Floor Insulation**

A \$350 grant is available for adding a minimum of R-20 to the entire exposed floor area, provided the exposed floor area is a minimum of 120 square feet or 11 square meters. This grant includes overhangs and floors above unheated spaces, including unheated garages. Crawlspace are a separate grant - above in Crawl Space Insulation).

Insulation Option:	Grant Amount
Insulate exposed floor area of a minimum 120sqft (11 square meters) with minimum additional insulation to R-20	\$350

## Air Sealing Upgrades

Up to \$1,000 is available for air sealing upgrades that improve your home's airtightness, as defined on your pre-and post-work energy audits.

The Renovation Upgrade Report (RUR) obtained following pre- post-work energy upgrades will provide the airtightness target for your home. As a result of hiring a professional company like Reitzel Insulation to complete air sealing upgrades in addition to your insulation upgrades, you will be entitled to higher grant amounts for exceeding your airtightness target, as detailed in your Renovation Upgrade Report.

Insulation Options:	Grant Amounts
Meet the air sealing target in your Renovation Upgrade Report (RUR)	\$550

Surpass the air sealing target in your RUR by 10% (i.e 0.9 x target value)	\$810
Surpass the air sealing target in your RUR by 20% (i.e 0.8 x target value)	\$1,000
